Currently, Dr. Chou is a director of center for Healing Environment Administration and Research (HEAR), Tunghai University. She is a reviewer for a number of professional journals.

Mustafa Çoban (Prof. Dr.)

Academic staff at the Akdeniz university with research focus on elderly care and home care services. Within the Elderly Care Program of Akdeniz University, he has worked to pioneer the scope of curriculum development in Turkey. For instance, the Elderly Care Program actively participated in "Technical Assistance for Improving the Quality of Vocational Education and Training in Turkey" during the period 2012-2014. As a result of this he was selected as the Erasmus Staff Ambassador of Turkey in 2011 by the European Commission. The main reason he was selected in this role is the Erasmus Project completed in 2007 by Dr. Mustafa Çoban on behalf of the Society of Elderly Care Technicians and Elderly Care Program of Akdeniz University.

With this project, the curriculum of the elderly care education was changed and the revised curriculum has been used as a basis for other elderly care programs in Turkey. In addition to this, the positive outcomes of that project led to the improvement of the reputation of this field of study. Moreover, he participated in meetings organized by the European Center for the Development of Vocational Training (CEDEFOP).
